

BIOCAT

A Soil Detoxifier

READ ENTIRE LABEL BEFORE USING THIS PRODUCT

GENERAL INFORMATION

BIOCAT™ is a bioremediation product. **BIOCAT™** is a soil amendment that is especially useful in reducing herbicide carryover from one crop to the next. The absorptive properties of **BIOCAT™** help immobilize organic pesticides, thereby removing them from the soil solution.

BIOCAT™ also helps restore the natural biological balance in the soil by promoting the activity of naturally occurring bacteria that can degrade pesticides.

BIOCAT™ is a proprietary blend and formulation of organic sequestering agents, organic acids, micro-nutrients, and surfactants.

Soil temperature and/or moisture level may affect results. Stimulation of bacterial growth is greatly reduced in cold and/or dry soils. Absorption of the organic pesticide is generally unaffected by soil temperature, but may be reduced in dry soils due to reduced mobility of the effective compounds.

NOT FOR AQUATIC USE

CAUTION: KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Avoid breathing spray mist. May cause irritation of nose, throat or skin. Avoid contact with eyes, skin and clothing. Do not contaminate feed and foodstuffs. Do not apply to any area not specified on label. Do not re-use empty container. Wash thoroughly with water and detergent. Puncture, make un-usable, dispose of in a safe place. Store out of sun in an area of moderate temperature. Will stain when applied to concrete.

INGREDIENTS

Natural polysaccharides	2%
Surfactants	2%
Organic Acids.....	7%
Lignin Polymers.....	25%
Blend of Enzyme Substrates	9%
Inert ingredients	55%
Total	100%

Net Contents: 5 gallons
Weight per Gallon: 9.57 lbs.

This product is manufactured by:
Northwest Agricultural Products, Inc.

821 S. Chestnut •Pasco WA 99301 •(509)547-8234

DIRECTIONS FOR USE

Shake well before using.
Add **BIOCAT™** to enough water to uniformly wet the soil surface.

Do not apply with any other agricultural products. (Contact Northwest Agricultural Products for information.)

BIOCAT™ is most effective when thoroughly incorporated into the soil at time of application because it must come in contact with the pesticide residue to work properly.

APPLICATION RATE

Apply 32 to 64 ounces per acre.
