GENERAL INFORMATION

BLUE-GREEN TIMOTHY BUILDER™ 8-10-0 is a blend of macro-nutrients, micronutrients, soil penetration aids, and NAP's Phosphate Enhancing STV chemistry for application in the first irrigation after cutting. It promotes water penetration and provides needed nutrients for fast regrowth.

The combination and quantities of micronutrients contained in BLUE-GREEN TIMOTHY BUILDER are specifically designed to promote healthy, darker green vegetation and lower the amount of brown vegetation on the leaf and stem. This combination should result in an improvement in color, feed value and yields.

DIRECTIONS FOR USE

Application Rate: Apply through the irrigation water only at 2 to 4 gallons per acre at the following times:

1. First irrigation of the season.
2. Boot stage
3. The first irrigation after cutting. Repeat at the boot stage.

Do not mix with calcium or sulfate containing products.

CONDITION OF SALE

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions of use. Since weather, crop, soil, and other conditions may vary, Northwest Ag Products, Inc. and/or seller make no warranty of any kind, expressed or implied, concerning the use of this product. The user assumes all risks of use of handling, whether or not in accordance with directions or suggestions.
