

Complexer II™

HUMIC ACID

READ ENTIRE LABEL BEFORE USING THIS PRODUCT

General Information

Complexer II™ is a concentrated solution of Leonardite shale from North Dakota and Canadian deposits noted for purity and absence of dangerous heavy metals. Extracted humic acid from Leonardite shale has been shown to increase the availability and uptake of nitrogen, phosphorus, calcium, iron, and magnesium; increase the osmotic process; provide release of auxins and amino acids; and serves as quality substrates for microorganisms.

Humic acid is found naturally in soils, but does not exist in all soils in quantities that will support optimum crop and tree growth. Adding humic acid to the soil is a positive, natural practice and promotes long term health of the soil.

Complexer II™ can be applied to all crops, including vegetables, row crops, field crops, feed crops, trees, vines, ornamentals, lawns, gardens, and landscaping.

Directions For Use

Complexer II™ can be mixed with almost all liquid fertilizers and liquid nutrients including seeding, pre-plant, side-dress, and water runs.

Soil Applied: Apply 3 to 6 gallons of **Complexer II™** per acre, preferably 1 gallon at 3 different times. It may be water run, side-dressed, mixed with soil-applied liquid nutrients, or sprayed directly on the soil. When sprayed or side-dressed without other nutrients, **Complexer II™** should be diluted in 3 to 10 gallons of water.

Precautions

Statement of Practical Treatment: Product may cause eye irritation. In case of contact, immediately flush eyes with water for at least 15 minutes. Do not rub eyes. Seek medical attention immediately.

Conditions of Sale

Seller warrants that this product consists of the ingredients specified and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions of use. No one other than the officer of Seller, is authorized to make any warranty, guarantee or direction concerning this product. Because the time, place, rate of application, and other conditions of use are beyond Seller's control, Seller's liability from handling, storage, and use of this product is limited to replacement of product.

Guaranteed Analysis

Humic Acid.....6%

Net Contents: 5 gallons

Weight per Gallon: 8.65lbs.

This product is manufactured by:
Northwest Agricultural Products Inc.
P.O. Box 3453
Pasco, WA 99302

Information regarding the contents and levels of metals in this product is available on the internet: <http://www.aapfc.org/metals.htm>

Washington State law requires that EPA-approved safety devices be in use when this product is used in any irrigation system.

Sprinkler or Drip Irrigation: Smaller amounts of **Complexer II™** may be applied in every irrigation set instead of making only one application. **Complexer II™** is not corrosive to pipes or nozzles and will not plug them.

Mixed with Nutrients: Apply 1/2 to 1 gallon of **Complexer II™** per acre mixed with the liquid nutrients. Add **Complexer II™** to a partially filled tank. Include **Complexer II™** with every application.

Transplanting or Cutting: Mix 1/2 gallon of **Complexer II™** per 20 gallons of solution.

Complexer II™ is compatible with almost all fertilizers, nutrients, pesticides, fungicides, and defoliants. If unfamiliar with its use, be sure to check with Northwest Agricultural Products, Inc. for compatibility or perform a jar test, mixing each product in the same ratios as to be field applied.

Fertilizers or nutrients with extremely low pH will cause the humic fraction to precipitate. It will be necessary to agitate your mix to obtain an even distribution of the humic fraction.

Foliar applied nutrients should be applied with **NAP Ful-Vac 3** instead of this product.
