

# COMPAC 300™

A Complexed Micronutrient Package

P.O. Box 3453-- Pasco WA 99302

(509) 547-8234

**CAUTION:**  
**KEEP OUT OF REACH OF CHILDREN**  
**HARMFUL IF SWALLOWED**  
**SHAKE WELL BEFORE USING**

## DIRECTIONS FOR USE

**Mixing Sequence:** 1. Water 2. COMPAC 300™ 3. Other products

**Application Rate:** Apply at the rate of 4 to 8 pints per acre to correct listed deficiencies.

**Fertigation Rate:** Apply at the rate of 4 to 8 pints per acre to correct listed deficiencies

**Dilution Rate:** When foliar spraying COMPAC 300™, use 20 gallons of water per acre through conventional sprayers, or 5-10 gallons of water per acre through low volume equipment. If less water is used, foliage may burn. In absence of agitation do not exceed a dilution ratio of 1:3.

COMPAC 300™ may be used in liquid fertilizer, including other ligno/citrate based products and/or many pesticides. Broadcast or row applications are acceptable, although greater efficiency may be expected from row applications. Trace element deficiencies usually occur when plants are small; therefore, trace elements should be added to fertilizer prior to planting.

COMPAC 300™ is processed with wetting agents that aid in aiding in spray tank wetting and dispersment, and lignosulfonates, which are organic complexing and chelating agents.

---

### GUARANTEED ANALYSIS GRADE 4-2-0

**Primary Elements (% by weight)**

Total Nitrogen (N).....4.0%  
*(Derived from urea nitrogen)*  
Total Phosphoric Acid (P<sub>2</sub>O<sub>5</sub>).....2.0%  
*(Derived from phosphoric acid)*

**Secondary and Minor Elements (% by weight)**

Sulfur (S) ..... 3.6%  
Copper (Cu) ..... 1.0%  
Iron (Fe) ..... 0.5%  
Manganese (Mn) ..... 1.0%  
Zinc (Zn) ..... 5.0%  
*(Derived from iron sulfate, manganese sulfate, zinc sulfate, and micronized copper sulfate.)*

**Net Contents:** 5 gallons

**Weight per Gallon:** 10.99 lbs.
