

## General Information

**In-Fuse®** is a blend of plant extracts, surfactants, natural polysaccharides, carboxyl/phenolic acids, chelating agents, and polystabilizers.

This product is designed to keep drip irrigation tubes clean and free of mineral deposits season long while delivering a soil conditioner to the soil. The soil conditioner will promote water and nutrient penetration and may support a population increase of beneficial soil microorganisms. Regular applications of **In-Fuse®** will help protect the investment in drip irrigation systems and may reduce costly repairs.

### Ingredients

#### CLEANING REAGENTS

Hydrochloric Acid.....	2.5%
Phosphoric Acid.....	25.0%
Nitric Acid.....	1.5%

#### SOIL ACTIVATORS & PENETRANTS

Phenoic Polyhydric Acid.....	2.0%
Sarsaponins.....	5.0%

#### FLOCCULANT

Maleic Anhydride Sulfonated Co-polymer.....	1.5%
---	------

#### WETTING AGENTS

Nonylphenoxyethyleneoxyethanol.....	0.10%
Ethyleneoxyethanol.....	0.14%
Glucosides.....	0.50%
Laureth Sulfate.....	0.45%

#### DISPERSING AGENT

Polymaleic Anhydride Anionic Co-polymer.....	1.5%
--	------

**SHAKE WELL BEFORE USING  
CAUTION: KEEP OUT OF THE REACH OF CHILDREN  
HARMFUL IF SWALLOWED**

## Directions For Use

**In-Fuse®** is designed to be applied in all drip irrigation systems by injecting the recommended rate during the last portion of the irrigation set. Ideally this is during the last two hours. This method of application allows some of the product to remain in the drip tubes until the next set. If the system has not received regular applications of **In-Fuse®** and is clogged, then a higher rate of product is recommended, after which the drip tubes may have to be opened up and flushed.

## Mixing Instructions

Dilute 1 part **In-Fuse®** with 9 parts water (1 gallon of **In-Fuse®** to 9 gallons of water). During the last 2 hours of the irrigation set, inject the dilute mixture at 20 ounces per 0.1 acre inch of water per hour. An application chart with further instructions is available through your dealer.

**In-Fuse®** is compatible with some fertilizers. Be sure to check with **Northwest Agricultural Products** for compatibility or perform a jar test before use, mixing each product in the same ratios as to be field applied.

## Statement of Practical Treatment

If in eyes, flush with water for 15 minutes. If on skin, wash with soap and water. Contact a physician if irritation or redness persists.

## Storage Instructions

If you use **In-Fuse®** in bulk, it can be stored and/or shipped in stainless steel, fiber-glass, or polyethylene tanks. For additional information contact **Northwest Agricultural Products** at (509) 547-8234.
