

GENERAL INFORMATION

INTRACEPT is a complex plant biostimulant and chelated micronutrient designed as a foliar or soil applied nutrient. **INTRACEPT** can be used on a large variety of crops. **INTRACEPT** should be applied at planting or at the beginning of stressful growth stages such as first true leaf, flowering, and fruit set. **INTRACEPT** is readily available and rapidly absorbed by the plant because of its natural complexing and chelation properties. **INTRACEPT** is water soluble and nontoxic to plants when applied as directed.

INTRACEPT is a proprietary formulation and blend of plant extracts, natural polysaccharides, and Amino Acid Chelated micronutrients. This product has been developed to enhance nutrient penetration, uptake, and utilization.

Guaranteed Analysis

Sulfur (S)	1.0%
Copper (Cu)	0.1%
Iron (Fe)	0.1%
Manganese (Mn)	0.33%
Zinc (Zn)	0.4%

(Derived from copper sulfate, ferrous sulfate, manganese sulfate, zinc sulfate, chelated with Amino Acids.)

ALSO CONTAINS NONPLANT FOOD INGREDIENTS

Polysaccharides	0.82%
Organic Acids	1.0%

(Derived from plant extracts and fermentation, amino acids derived from kelp)

Condition of Sale

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions of use. Since weather, crop, soil, and other conditions may vary, NAP and/or seller make no warranty of any kind, expressed or implied, concerning the use of this product. The user assumes all risks of use of handling, whether or not in accordance with directions or suggestions to the extent consistent with applicable law.

INTRACEPT™

A Complex Plant Biostimulant and Chelated Micronutrient

Manufactured by Northwest Agricultural Products, Inc.
P.O. Box 3453 - Pasco, WA 99302
509 / 547-8234

Net Contents:

- 5.0 gallons
- 2.5 gallons
- 1.0 gallons

Weight per Gallon: 9.75 lbs.

SHAKE WELL BEFORE USING, DO NOT FREEZE
CAUTION: KEEP OUT OF THE REACH OF CHILDREN
HARMFUL IF SWALLOWED

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Observe all cautions and limitations on this label and labels of products used with **INTRACEPT**.

Application Instructions

FOLIAR: Apply in an adequate amount of water that will provide complete coverage of the plants. Use of a non-ionic wetting agent may improve spray coverage of certain hard to wet plants. **INTRACEPT** can be included in a regular spray program on crops.

SOIL: In a planter band application a soil barrier between the seed and **INTRACEPT** is preferred.

Consult with your Certified Crop Advisor regarding compatibility with other materials and for proper rate and timing of application. The rate and timing of application will depend on the crop and stage of growth.

Recommendations

INTRACEPT may be used on a variety of crops such as legumes, small grains, root crops, vegetable crops, vine crops, tree fruits and nuts, citrus trees, tropical and subtropical fruits.

Potatoes: Apply 16 to 32 fl. oz. per acre. **INTRACEPT** can be applied in a planter band followed by a foliar application at the appropriate time. Applications may be repeated 2 or more times through out the growing season. Consult with your Certified Crop Advisor for varietal restrictions.

Fruit Trees: Apply 2 to 32 fl. oz. per acre before blossoming and shortly after petal fall.

Melons and Vine Crops: Apply 2 to 32 fl. oz. per acre at first female flower and again at softball size fruit.

Onions: Apply 2 to 32 fl. oz. per acre at bulb initiation (1/2" to 3/4" diameter). Applications may be repeated 2 or more times through out the growing season. A second application (1.5" to 2" bulb diameter) is recommended.

Precautionary Statements

In all cases, it is recommended that a **JAR TEST FOR COMPATIBILITY** be conducted with any tank mix combination using **INTRACEPT**.
