

KOOL-KORE™

CONDITIONS OF SALE AND WARRANTY

Northwest Agricultural Products, Inc. (NAP) warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated when used in accordance with the use directions under normal conditions. NAP neither makes nor authorizes any agent or representative to make any other warranties, express or implied, including fitness or merchantability.

The directions for the use of this product are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as timing and method of application, weather and crop conditions, presence of other materials, or other influencing factors, all of which are beyond the control of NAP and seller. Buyer and user acknowledge and assume all liability resulting from the handling and use of this material not in strict accordance with directions given herewith. In no case shall NAP or the seller be liable for consequential, special, indirect, or incidental damages or losses resulting from the handling or use of this product. The foregoing is a condition of sale by NAP and is accepted as such by the buyer.

OVERHEAD IRRIGATION OR COOLING IS NOT PREFERRED

Overhead irrigation may wash off the film and reduced efficacy will result. Overhead irrigation is not preferred, but if used, should be used just prior to the next application to prevent premature wash-off. Wait until there no visible water droplets on foliage to apply KOOL-KORE™ after overhead irrigation. Use of overhead cooling with KOOL-KORE™ is not recommended.

DIRECTIONS FOR USE

KOOL-KORE™ is designed specifically for sunburn protection of fruit, nuts, and foliage of a variety of crops.

MIXING: Fill the mix tank ½ full of water, start mechanical agitator, add recommended amount of KOOL-KORE™ and finish filling tank. Continue agitating solution until thoroughly mixed.

Application: KOOL-KORE™ may be applied by either ground or aerial application equipment. Good coverage is essential for adequate sunburn protection.

NOTE: When applied shortly before harvest, KOOL-KORE™ may leave a white residue that may be undesirable for fresh-market fruits and vegetables.

Avocados and Citrus – Mix 10-15 gallons KOOL-KORE™ per 100 gallons water and apply 100-150 gallons finished spray per acre, depending on tree size.

Deciduous Fruit Trees and Vines, including Apples, Apricots, Cherries, Grapes, Nectarines, Peaches, Pears, Plums, Prunes, etc. – Mix 5-15 gallons KOOL-KORE™ per 100 gallons water and apply 100-200 gallons finished spray per acre, depending on tree size.

Vegetable and Row Crops, including Melons, Onions, Peppers, Tomatoes, etc. – Mix 10-15 gallons KOOL-KORE™ per 100 gallons water and apply 80-150 gallons finished spray per acre.

Walnuts – Mix 15 gallons KOOL-KORE™ per 100 gallons water and apply 120-500 gallons finished spray per acre, depending on tree size.

CAUTION: KEEP OUT OF THE REACH OF CHILDREN--HARMFUL IF SWALLOWED
