

General Information

NAP 0-8-0™ is a concentrated foliar nutrient spray solution containing Zinc and Phosphate in a readily available, soluble form. It also contains surfactants and buffering agents for use where these are of value in improving the stability of pesticides and other foliar nutrients. Do not add this product at a concentration that would exceed 5% of finished spray volume.

NAP 0-8-0™

A Soluble Liquid Foliar Spray

Distributed by Northwest Agricultural Products
P.O. Box 3453 - Pasco, WA 99302

509 / 547-8234

Net Contents: 2.5 Gallons
5 Gallons

Weight per Gallon: 9.16 lbs.

Applications

NUTRITIONAL SPRAY - For potatoes, sugar beets, small grains and all other row crops. Apply when tissue analysis indicates need for phosphorous or zinc. Apply 2-3 pts/100 gallons of water. May be applied by air, concentrate sprayer or conventional ground equipment.

SPREADERS - Use ½ to 2 pints per 100 gallons or ½ to 2 pints per acre by air or concentrate.

BUFFERING AGENT – Use 4oz. to 3 pts. per 100 gallons as required to lower the pH and offset the effect of alkaline water on insecticides and foliar nutrients.

NOT FOR AQUATIC USE.

CONDITION OF SALE

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions of use. Since weather, crop soil, and other conditions may vary, NAP and/or seller makes no warranty of any kind, expressed or implied, concerning the use of this product. The user assumes all risks of use of handling whether or not in accordance with directions or suggestions.
