

Poly-Amine S-525

INGREDIENTS

Active Ingredients:

PolyAmine Glucosides extracted from lactobacillus fermented solubles.....52%

Amino Acids from fermentation.....8%

GENERAL INFORMATION

Poly-Amine S-525 is nutrient enhancing technology. When used with a full fertility program and best management practices, studies show **Poly-Amine S-525** can increase yields in crops like corn, soybeans, cotton, wheat and vegetables.

Poly-Amine S-525 is not a fertilizer. It is a long chain polymer amino acid called PolyAmines.

Poly-Amine S-525 can be easily mixed with liquid fertilizer. It can also be impregnated onto dry fertilizer. It won't corrode or rust tanks or application equipment.

Poly-Amine S-525 is safe to humans and to the environment. It's non-toxic. Biodegradable. No EPA restrictions apply.

Nutrient enhancing technology

A Bio/Chemical Manufacturing Company

P.O. Box 3453, Pasco, WA 99302 (509)547-8234

Weight per Gallon 10.0 Pounds

**SHAKE WELL BEFORE USING.
CAUTION: KEEP OUT OF REACH OF
CHILDREN
HARMFUL IF SWALLOWED.**

DIRECTIONS FOR USE

Apply at 24 ounces/acre with each irrigation. Mix with water the amount depending on the method of application.

Application Methods:

1. Spray: Applied with common spraying equipment prior to irrigation in a minimum of 20 gallons of water per acre.
2. Drip Systems: Apply during the first 25-50% of the total irrigation time. Inject directly into the drip system.
3. Sprinkler System: Apply during the first 25-50% of each set of the total water run time. Inject into the sprinkler system.
4. Flood or border irrigation: Apply continuously during 100% of the water run time. Meter or drip into the irrigation water at a point of turbulence.
